

The Institute for Clinical Investigation (ICI) is currently looking to fill a Clinical Project Manager position.

Job Description: Clinical Project Manager

Position Summary:

Responsible for the support of assigned sites in accordance with Good Clinical Practice (GCP), ICH guidelines and federal regulations. Close collaboration with other members within Clinical Trial Management (CTM). May be responsible for monitoring assigned sites in accordance with our company's SOP's and submitting the proper documentation to the national authorities for approval.

Potential candidates should fulfill the following criteria:

- A Bachelor's/MSc degree is required (science-related discipline strongly preferred, i.e. Pharmacology, Chemical Engineering, Biology etc.).
- A minimum of 3 years of clinical trial experience within pharmaceutical, biotechnology, CRO company and/or healthcare setting.
- Excellent command of English.
- Demonstrated computer skills (MS Office, PowerPoint)
- Demonstrates core understanding of medical terminology and clinical trial activities in relation to execution of a clinical development plan.
- Ensure compliance with the application and communication of all company's policies, procedures and fundamentals.
- Direct expertise of site management and logistical execution of clinical trials for at least 2 years.
- Knowledge of GCP as relates to clinical trial management
- Excellent written, verbal and presentation skills.
- Previous on-site monitoring experience preferred.

Should you wish to be a member of our team, please send us your CV to info@ici-trials.gr, by quoting the reference code (CPM).
